PUBLISHED
December 2022

The “2022 Refractive Surgery Market Report” features an updated analysis of new topical treatments in pipeline for myopia and presbyopia—including forecasts for the total available, addressable, and serviceable markets. The report further segments the serviceable presbyopia market by refractive error, age, and region. It also further examines the high and young myopic markets with forecasts for total available, addressable, and serviceable markets including the serviceable myopic population under age 20 by myopia severity.

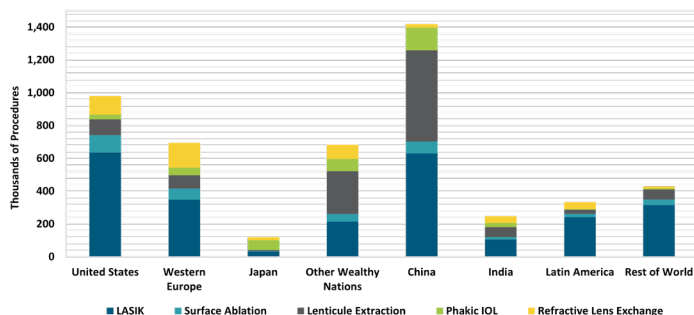

Market Scope

2022 Refractive Surgery Market Report

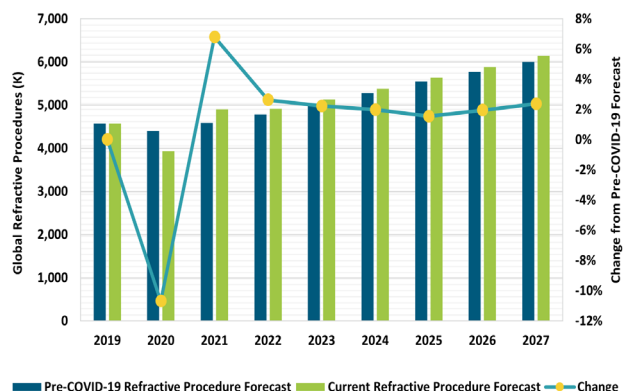

The “2022 Refractive Surgery Market Report” analyzes the global refractive and presbyopia-correcting market, identifying important trends and key factors for future success. It focuses on the 2022 refractive and presbyopia-correcting surgical market and forecasts market growth and evolution over the next five years. Included are discussions and market estimates for LASIK, lenticular extraction, phakic IOLs, refractive lens exchange (RLE), and other technologies that may disrupt the market. Also included:

- Overview of vision correction
- Demographics of refractive disorders
- Refractive surgery technologies
- Patient economics
- Refractive surgeons and laser centers
- Regulatory issues
- Refractive technologies and their manufacturers: microkeratomes, femtosecond and excimer lasers, phakic IOLs.
- Alternative technologies—thermokeratoplasty, Intacs, PC-IOLs, laser ablation patterns, corneal inlays, etc.
- Detailed market analysis and five-year market forecasts.
- 21 competitor profiles.

Global Refractive Procedures by Region and Type

COVID-19 Impact on Refractive Procedures and Global Forecast

The report also now provides 10 years of historical LVC procedure volumes and includes new analysis of procedure mix breakdown both globally and regionally, including lenticular extraction procedures by region.
