AUTHOR
Chelsea Jones, MBA

PUBLISHED
December 2024

The new “2024 Refractive Surgery Market Report” features an entirely new section focused on the Asia-Pacific refractive market, summarizing and highlighting the vision correction market this region. This section analyzes the vision care population by segment, the refractive error population by diopter, counts of refractive surgery centers and surgeons by country, market revenue forecasts by technology and procedure type, and presbyopia market opportunities.

The report also features new figures that estimate the average age of femtosecond and excimer lasers on the market in each region of the world and includes updated estimates of the refractive error population.

Market Scope

2024 Refractive Surgery Market Report

The “2024 Refractive Surgery Market Report” analyzes the global refractive and presbyopia-correcting market, identifying important trends and key factors for future success. It focuses on the 2024 refractive and presbyopia-correcting surgical market and forecasts market growth and evolution over the next five years. Included are discussions and market estimates for LASIK, lenticular extraction, phakic IOLs, corneal inlays, refractive lens exchange (RLE), and other technologies that may disrupt the market. Coverage also includes:

- Overview of vision correction
- Demographics of refractive disorders
- Refractive surgery technologies
- Patient economics
- Refractive surgeons and laser centers
- Regulatory issues
- Refractive technologies and their manufacturers: microkeratomes, femtosecond and excimer lasers, phakic IOLs.
- Alternative technologies—thermokeratoplasty, Intacs, PC-IOLs, laser ablation patterns, corneal inlays, etc.
- Detailed market analysis and five-year market forecasts.
- 16 competitor profiles.

Our Process

Market Scope’s industry reports are meticulously prepared by a dedicated team of in-house analysts with over 100 years of collective ophthalmic market research experience. Each data point is driven by a combination of sources, including:

- Our proprietary global disease population and demographic models
- Analysis of company-published financial reports
- Focused coverage of ophthalmic scientific research, business news, and other activities
- Attendance and participation in worldwide ophthalmic meetings
- Interviews and relationships with company executives and practicing physicians
