RELEASED
June 2017

This year's report had been reorganized into retina, glaucoma, and secondary cataract categories due to the growing importance of 810 nm photocoagulation lasers for the treatment of glaucoma. Our analysis has also been updated to reflect changing paradigms in the treatment of diabetic retinopathy.

Market Scope

Our Process

Market Scope's industry reports are meticulously prepared by a dedicated team of in-house consultants/analysts with over 100 years of collective ophthalmic experience and each data point is driven by a combination of sources, including the following:

- Our proprietary global disease population and demographic models
- Twenty years and counting of ophthalmologist survey data
- Analysis of company published financial reports
- Focused coverage of ophthalmic scientific research, business news, and other activities
- Attendance and participation in major, worldwide ophthalmic meetings
- Interviews and long-standing relationships with company executives and practicing ophthalmologists

About Us

Market Scope is recognized as the leading source for accurate and timely industry information in ophthalmology.

We have been conducting primary research and producing comprehensive reports on ophthalmic markets since 1996. Our data, analysis, and forecasts serve as starting points for many annual planning cycles, strategic plans, acquisition analyses, and return-on-investment decisions in the industry. In addition, our information is routinely included in annual reports, SEC filings, and investor presentations by leading ophthalmic companies.
